

10 Gigabit Armored Multimode Fiber Optic Interface

Overview

This SFP+ transceiver allows you to connect a 50/125 multimode fiber optic cable to a 10 Gbps network router, server or switch. It transmits data up to 220 meters (721 feet) and supports bi-directional Gigabit Ethernet communication up to 11. One of the most widely deployed optical solutions for short-distance 10G links is the multimode SFP+ transceiver, commonly referred to as a 10GBASE-SR module. Jacketed aluminum interlocking armor provides the best balance of ruggedness, flexibility, and low weight. The. Armored Tight Buffered CPC Cables combine 4 to 144 fiber count CPC cables within a jacketed, aluminum interlocking armor. General-use zipcord cable for patching, desktop, and backbone connections. ITEM# FO10G-002M-LCLC, FO10G-010M-LCLC.
