

Can a 100 Mbps fiber optic cable be installed in a home

Overview

The answer to whether you can run fiber optic cable within your home is a definitive yes, and it is a practice known as internal fiber networking or Fiber to the Desk/Room. This process involves extending the high-speed optical connection from your service provider's demarcation point to specific. Q: How is FTTH installed to a home?

A: Installation involves running fiber optic cable from the nearest distribution point to the home, installing an ONT (Optical Network Terminal), and connecting it to the home router. Q: What is an ONT?

A: An ONT (Optical Network Terminal) converts optical. This article will give you an overview of the use cases for fiber-optic networking, some of the terms used in fiber networking, and suggestions for setting up a fiber network. In an FTTH network, fiber cable is used over the “last mile” in place of lower bandwidth DSL and coaxial wires.
