

Egypt lays fiber optic cable

Overview

Telecom Egypt, in partnership with global submarine cable provider SubCom, announced the successful landing of the SEA-ME-WE-6 (Southeast Asia-Middle East-Western Europe 6) submarine fiber optic cable system at Port Said and Ras Ghareb. According to press release of the Ministry of Communications and Information Technology (MCIT) of Egypt, Telecom Egypt and Suez Canal Authority, in coordination with the Armed Forces Signal Corps, has signed an agreement to create a new route for fiber optic internet cables between the Red Sea and. The Minister of Trade and Industry and Chairman of the General Authority for the Suez Canal Economic Zone and Chairman of the Arab Organization for Industrialization witnessed the cooperation agreement ceremony between Bennaya Capital and Arab Industrialization Company. Bunya Capital (previously. Once operational, the SEA-ME-WE-6 cable should help improve the quality and resilience of internet connectivity in the affected regions. It would also optimize traffic management and meet the growing demand for high-speed international bandwidth. This high-capacity, low-latency data corridor will connect. Telecom Egypt and Hungarian telco 4iG will build and operate a fiber-to-the-home and fiber-to-the-site network in Egypt.
