

Fiber optic cable type for drop cables

Overview

Fiber Optic Drop Cable -Types, Structure & FTTH Learn what fiber optic drop cable is, its main types, structures, and FTTH applications. Fiber Drop Cables.

Key Takeaways

Fiber optic drop cables are typically low-fiber-count cables (1–4 fibers) designed for indoor or outdoor FTTH applications, with variations including indoor FRP or steel-reinforced, outdoor self-supporting, flat, and figure-8 aerial types. Common Types and Structures

Indoor Drop Cables: These are lightweight, flexible, and designed for routing inside buildings. They often use FRP (Fiber Reinforced Plastic) or steel wire reinforcement, a butterfly-shaped flat structure, and a low-smoke, zero-halogen (LSZH) sheath. Typical models include GJXFH, GJXH, and GJXKH, with 1–4 fibers, suitable for residential or office FTTH installations .

Outdoor Self-Supporting Drop Cables: Designed for aerial deployment, these cables are figure-8 or circular in shape, with the fiber unit in the center, reinforced with metallic steel wire or FRP, and often include an additional steel wire for self-support. They are UV-resistant, water-blocked, and durable for long-term outdoor exposure. Common models include GJYXCH, GJYXFCH, and GJYXKCH .

Flat Drop Cables: These have a flat polyethylene (PE) sheath with a loose tube containing the optical fiber and two FRP reinforcements for tensile and compression resistance. They can support up to 12 cores and are suitable for both indoor and outdoor applications where flexibility and mechanical protection are needed .

Figure-8 Aerial Drop Cables: Self-supporting cables with a central fiber core and a steel messenger wire, designed for economical aerial installation. They are ideal for outdoor FTTH networks and can withstand environmental stress such as wind and UV exposure .

Key Specifications

- **Fiber Count:** Typically 1–4 fibers for standard FTTH, up to 12 for specialized needs .
- **Fiber Type:** Bend-insensitive G.657.A2 fiber is standard for drop cables, allowing tight bends without signal loss .
- **Reinforcement:** FRP or steel wire for indoor cables; steel wire plus FRP for outdoor self-supporting cables .
- **Sheath Material:** LSZH for indoor safety; PE or flame-retardant PVC for outdoor durability .
- **Installation:** Indoor cables can be routed through conduits or open wiring; outdoor cables can be aurally suspended or buried in conduits .

Summary

The type of fiber optic drop cable depends on the installation environment and mechanical requirements. For indoor residential FTTH, 1–2 fiber FRP or steel-reinforced flat cables are common. For outdoor aerial deployment, figure-8 self-supporting cables with steel reinforcement are preferred. Flat drop cables offer versatility for both indoor and outdoor use, while maintaining bend resistance and mechanical protection.

Fiber Optic Drop Cable Guide for FTTH Deployment

Discover fiber optic drop cable types, materials, and installation tips to improve FTTH deployment reliability, reduce

Comparing the Different Types of Fiber Optic Drop Cable

In this article, we will compare the different types of drop cables, focusing on their unique features and applications.

Understanding Fiber-Optic Drop Cables: Purpose, Types and LiteLinx ...

Drop cables are critical for network reliability and operational flexibility. Selecting the appropriate type requires understanding the

Understanding Fiber Optic Drop Cables: Types, Features, and

A fiber optic drop cable is a type of cable used to connect the main fiber optic network to end-users, providing high

Outdoor Fiber Optic Cable Types: Complete Guide

Drop cables connect the main distribution cable traversing a region to end-user homes or commercial buildings.

Understanding Fiber-Optic Drop Cables: Purpose, Types and LiteLinx ...

Fiber-optic networks rely on a variety of cable types to deliver high-bandwidth connectivity from the service provider to the end user.

Fiber Optic Cables | Corning

With 2 billion kilometers of fiber optic cables installed around the globe, Corning continues to lead the industry in product quality and

FTTH Drop Cable | Indoor & Outdoor Fiber Optic Drop Wire (Flat/Aerial)

Our comprehensive selection of fiber optic drop cables features the industry-standard flat "butterfly" or "bow-type" design. This

Types of Fiber Optic Cables: A Comprehensive Guide | Network Drops
