

Horizontal rails of outdoor cable trays

Overview

Horizontal cable railings use tensioned metal cables as the infill between posts, creating a clean barrier that preserves views and natural light. Done well, they look modern without feeling cold, and they fit both new builds and upgrades where the old railing felt bulky. Texture: cable infill is made of highly-polished metal. With the widest range of cable rail options in the market, our horizontal cable railing is available in: Cable railing may seem complex to the inexperienced installer, but our cable railing kits. Stair Solution offers a complete line of horizontal railing and vertical cable wire railing systems for interior/exterior stair, entry, and deck applications. Our wide selection of horizontal railing includes: rods, stainless steel cable, wood, and powder-coated metal. Keylink's cable railing collection showcases premium cable railing kits, including the versatile American Series and the innovative Chesapeake Series, available in both. With the RS 60 cable tray installation system, we offer you the last installation type of the standard support construction, so that you can implement all installations required in the building project with circuit integrity maintenance on the basis of the standard support construction.
