

Industrialized power distribution boxes

Overview

Industrial distribution boxes are designed to distribute power efficiently and safely across a wide range of applications, such as from production lines in manufacturing plants (or processing plants) to office buildings or renewable energy installations. A Power Distribution Unit (PDU) allows two generators to be synchronized, and both are brought online to supply power to a common bus. The PDU is sized to handle the load that the two. Our portfolio covers the full spectrum of Power Distribution Units – from permanently installed wall-mounted units to a wide range of mobile solutions. Whether large energy and main Power Distribution Units, portable sub-distribution boxes, compact units or power outlet blocks – we offer the right. The CA-44as is a double insulation modular box equipped with a high opaque cover, designed for robust protection and versatile installation in various sectors. Its construction from polyester-polycarbonate ensures.
