

Italian Intelligent Micro-Module Company

Overview

Tech Library: TDK collaborates with Texas Instruments on new i3 Micro Module, the world's first sensor module with built-in edge AI and wireless mesh connectivity.

Key Takeaways

Mipot is Italian company offering high-quality EMS and ODM services, specialized in designing and manufacturing wireless modules and systems for different market segments from the industry to the consumer, in Italy and worldwide. Discover top 8 Italian electronics companies—leaders in semiconductors, automotive, industrial automation, and defense—and how Highleap delivers PCB solutions. Micro module data center SDC300-M solution is a rapid, efficient, convenient, intelligent management, integrated data center solutions that be released for fast demand of cloud computing, big data, Internet of things. It Integrated Sunsea's efficient and reliable power precision distribution system. MEMC Electronic Materials, a subsidiary of GlobalWafers, specializes in the production of silicon crystals and wafers for microelectronics applications. Their Novara facility is the largest producer of 200mm silicon wafers in the EU, supplying key sectors such as automotive and energy, highlighting. Among Italian microelectronics companies, Optoi succeeded in consolidating its position thanks to a constant focus on research, a great innovating spirit and the ability to customise its products to meet the requirements of each customer. Mipot headquarters are located in Cormons (Gorizia), in the.
