

Jiyue Distribution Box Thickened 691

Overview

Jiyue distribution box 1.5thickened model: the new favorite for. It is made of thickened metal material with a thickness of 1.5mm, which is much stronger.

Key Takeaways

The Jiyue Distribution Box Thickened 691 is a durable, 1.5mm thickened metal distribution box designed for safe, flexible, and moisture-resistant electrical installations. Key Features

Material and Durability: The box is made of thickened metal with a 1.5mm thickness, providing superior strength compared to standard distribution boxes. It is rust-proof and moisture-proof, making it suitable for humid environments such as kitchens and bathrooms . **Safety and Internal Design:** Each line inside the box has an independent partition, preventing line confusion. It includes special circuit breakers and leakage protection devices, which automatically cut off power in case of abnormalities, enhancing home electrical safety . **Installation Flexibility:** The Jiyue 691 supports both concealed and exposed installation. Concealed installation allows embedding the box in walls for a neat appearance, while surface-mounted installation can be hung directly on walls, combining practicality with aesthetic appeal . **Intelligent and User-Friendly:** Beyond basic distribution, the box functions as a home electricity manager, offering organized wiring and easy access for maintenance. Its design simplifies installation, requiring minimal tools and effort . **Warranty and Support:** Manufacturers provide technical consultation, installation guidance, maintenance, and warranty services, ensuring reliable long-term use .

Applications

The Jiyue Distribution Box Thickened 691 is suitable for residential and light commercial use, particularly in areas where moisture resistance, durability, and safety are priorities. It can house multiple circuit breakers and manage complex wiring setups efficiently.

Summary

The Jiyue 691 thickened distribution box combines robust construction, safety features, and flexible installation options, making it a reliable choice for modern electrical systems. Its 1.5mm thick metal body, moisture resistance, and intelligent internal layout ensure both safety and convenience for homeowners and electricians alike .
