

Mexico Pluggable Optical Module OSFP

Overview

The OSFP MSA roadmap provides an excellent mechanical and electrical solution for 800G, 1.2T pluggable optics with best-in-class thermal performance and support for break-out applications, making these form factors a great choice to deliver the next-generations of. Kyocera Corporation (President: Hideo Tanimoto, hereinafter "Kyocera") is pleased to announce the development of a pluggable optoelectronic module (OSFP-XD*1) supporting the PCIe®*2 6.0 standard as a new product in its OPTINITY® optoelectronic module series, which contributes to optical. While the industry-standard OSFP (Octal Small Form-Factor Pluggable) module has successfully enabled 400Gbps, 800Gbps, and 1.6Tbps optical pluggable modules, it is limited to 32 modules per Rack Unit (RU), typically requiring 2 RUs to achieve 102.8Tbps of switching. Octal Small Form-factor Pluggable (OSFP) solution that fits into high-density switch and router client ports for optical interconnect links Powered by Greylock and Delphi DSP ASICs, and silicon photonic integrated circuits (PICs) for an optimized co-packaged design with 3D Siliconization Supports. OSFP Packaged Optical Module by Application (Data Center, Cloud Computing, Large Scale Network, Others), by Types (200G, 400G, 800G, Others), by North America (United States, Canada, Mexico), by South America (Brazil, Argentina, Rest of South America), by Europe (United Kingdom, Germany, France. The OSFP MSA is proud to introduce OSFP1600 and OSFP-XD to the industry. This whitepaper highlights the key aspects and features of each solution with the expectation that both solutions will have a place in future data center applications.
