

Network fiber optic patch cord manufacturer direct sales

Overview

Fiber Optic Patch Cables for Sale Buy 3m Amphenol FO-DUALLCX2MM-003 Cables Direct from the Factory at Cables on Demand. 100% optically tested duplex Fiber.

Key Takeaways

You can purchase fiber optic patch cords directly from OEM manufacturers like GETEKnet, Amphenol via Cables on Demand, UnitekFiber, EFB-Elektronik, and YingFeng, offering standard, customized, and high-density solutions for telecom, FTTH, and data center networks. Leading Manufacturers and Direct Sales Options

GETEKnet provides a wide range of OEM fiber optic patch cords, including standard, drop cable, and MPO types. They offer single-mode and multimode cords, simplex and duplex configurations, and pre-terminated drop cables for FTTH networks with SC/APC, LC/APC, SC/UPC, or LC/UPC connectors. Their products are suitable for indoor and outdoor use, featuring UV resistance, weatherproofing, and bend-insensitive fibers. Customers can customize length, jacket material (PVC or LSZH), and fiber type (G.652D, G.657A1/A2) to meet project requirements. Cables on Demand sells Amphenol fiber optic patch cables factory-direct, including LC, SC, FC, ST, MT-RJ, and MTP/MPO connectors. They offer single-mode (OS1) and multimode (OM1, OM2, OM3) cables, supporting high-speed applications up to 10Gbps. Direct factory sales allow for flexible lengths and configurations suitable for data centers, 4G/5G, AI/ML/HPC, and LAN networks. UnitekFiber specializes in single-mode and multimode patch cords using Corning glass fiber. They provide OEM services for custom colors, cable printing, and packaging design, with certifications including RoHS, UL, and CRP. Connector types include LC, SC, ST, MU, and MPO/MTP, and they support various fiber counts and jacket materials for different network environments. EFB-Elektronik offers a broad selection of fiber optic patch cables, including LC duplex, SC duplex, and MTP cables with OM3 and OM4 fiber types. They provide customized solutions, fast delivery, and expert advice, supporting low insertion loss and return loss for high-performance networks. Their products are suitable for rack-to-rack connections and high-density deployments. YingFeng supplies single-mode, multimode, armored, and custom patch cords for telecom, FTTH, and data center applications. They offer customizable lengths, connector types (LC, SC, FC, ST, MPO/MTP, E2000, MU, hybrid), fiber standards (OS2, G657A1/A2, OM1-OM5), and cable structures including simplex, duplex, uniboot, breakout, and armored. They also provide PVC, LSZH, OFNR, OFNP, outdoor, and bend-insensitive options, supporting high-density and high-performance optical networks.

Key Considerations for Direct Purchase

- **Customization:** Most manufacturers allow custom lengths, jacket materials, fiber types, and connector combinations to match specific network requirements.
- **Certifications:** Look for RoHS, UL, and CRP certifications to ensure reliability and compliance.
- **Application:** Choose based on deployment type—FTTH, data center, telecom backbone, or high-density racks.
- **Delivery and Support:** Direct factory sales often provide faster lead times, technical support, and bulk pricing options. By sourcing directly from these manufacturers, you can ensure high-quality, customizable fiber optic patch cords suitable for modern network infrastructures while benefiting from factory pricing and support.
