

Price list for 36-core optical fiber cable

Overview

Fibre optic cables are network cables that contain one or more transparent optical fibres that are used to carry light.

Key Takeaways

The price of a 36-core optical fiber cable ranges from approximately \$0.09 to \$1.52 per foot (\$0.30 per meter for bulk purchases), depending on type, mode, and supplier.

Pricing Overview

- **Bulk Material Cost:** For wholesale purchases, 36-core fiber optic cables can cost around \$0.09 per foot for single-mode fiber, with multi-mode variants slightly higher, up to \$1.52 per foot depending on construction and quality . Alibaba listings show prices close to \$0.10 per meter for G652D single-mode cables, suitable for bulk orders .
- **Retail and Pre-Terminated Assemblies:** Retail prices are higher, typically \$1 to \$6 per foot, especially for pre-terminated or armored cables designed for harsh environments .
- **Factors Affecting Price:** Cable type (single-mode vs multi-mode), strand count, jacket material, indoor/outdoor rating, and whether the cable is armored or plenum-rated all influence cost . Higher strand counts and specialized construction increase the price proportionally.

- **Supplier Options:** Verified suppliers on platforms like Alibaba and GoldSupplier offer competitive pricing for bulk orders, often with discounts for large volumes . Prices may vary based on shipping, certifications, and minimum order quantities.

Practical Considerations

- **Single-Mode Fiber:** Ideal for long-distance transmission, lower per-foot cost, but requires more expensive transceivers.
- **Multi-Mode Fiber:** Suitable for shorter distances like LANs or data centers, slightly higher per-foot cost, but lower equipment cost.
- **Installation Costs:** Material prices do not include installation, which can significantly increase total project cost, especially for underground or aerial deployments .

In summary, for a 36-core optical fiber cable, expect \$0.09–\$1.52 per foot for materials, with bulk single-mode cables being the most cost-effective option, while specialized or pre-terminated assemblies can reach higher prices depending on specifications and supplier .
