

Price list for galvanized outdoor cable trays

Overview

Cable Tray & Accessories WBT Performance Cable Tray, Shaped 4"X8"X118", Pregalvanized. Provides optimal support for high-performance data cable, up to Cabl.

Key Takeaways

Galvanized outdoor cable trays typically range from \$1.2 to \$200 per unit, depending on type, size, and material thickness. Price Ranges by Tray Type

- Cable Ladder Trays: Designed for heavy-duty outdoor use, these trays feature rails and rungs for large cables. Prices generally range from \$50 to \$200 each, influenced by steel thickness, ladder width, and galvanization quality .

- Perforated Cable Trays: These trays have punched holes for ventilation and drainage, suitable for outdoor environments. Wholesale prices can start as low as \$1.2 per unit, making them cost-effective for large projects .

- Mesh or Basket Trays: Typically made from galvanized steel or aluminum, these trays are used for lighter cable loads and offer good airflow. Prices vary based on dimensions and coating thickness, often falling between \$20 and \$150 per unit depending on specifications .

Factors Affecting Pricing

- Material and Coating: Hot-dip galvanization provides superior corrosion resistance compared to standard galvanization, which can increase costs .

- **Tray Dimensions:** Width, depth, and length directly impact material usage and price. Longer or wider trays cost more.
- **Load Capacity:** Trays designed for heavy industrial cables require thicker steel and reinforced structures, raising the unit price .
- **Manufacturing Location:** Chinese manufacturers in Jiangsu, Zhejiang, and Guangdong offer competitive pricing due to integrated production facilities, reducing unit costs by 18–32% compared to EU or North American suppliers .
- **Customization and OEM Options:** Factory-direct or OEM trays tailored to specific project requirements may have higher prices but offer flexibility and compliance with standards like ASTM A653 for galvanized steel .

Supplier Considerations

- Verify ISO 9001 quality compliance and relevant standards for outdoor cable trays.
- Request mill test certificates (MTCs) and coating thickness reports ($\geq 65\mu\text{m}$ zinc per ISO 1461) for durability assurance .
- Consider bulk orders or volume discounts to reduce per-unit costs, especially for large-scale industrial or infrastructure projects . In summary, galvanized outdoor cable trays are available at a wide price range depending on type, material, and supplier. For industrial-grade ladder trays, expect \$50–\$200 per unit, while perforated or mesh trays can be sourced for as low as \$1.2 per unit in bulk. Choosing a reliable manufacturer with proper certifications ensures both cost efficiency and long-term durability.
