

Price of Guest Room Main Electrical Distribution Box

Overview

Hotel Room DB is designed for reliable distribution and control of electrical power specifically for hotel rooms.

Key Takeaways

The typical cost of a guest room electrical distribution box ranges from approximately \$150 to \$600 per unit, depending on capacity, features, and manufacturer. Price Range and Factors

Guest room electrical distribution boxes, also known as hotel room DBs or low-voltage power switchboards, are designed to manage and protect electrical circuits in hotel rooms, including lighting, air conditioning, sockets, and mini-bars . The price varies based on:

- Capacity and number of circuits: More circuits or higher amperage ratings increase cost .
- Safety features: Inclusion of residual current devices (RCDs), surge protection devices (SPDs), and modular breakers adds to the price .
- Material and build quality: Steel enclosures are generally more expensive than plastic, and premium finishes or aesthetic designs for hotel interiors can raise costs .
- Brand and certification: Products tested to IEC standards (e.g., IEC 61439-3, IEC 60898-1) or from reputable manufacturers like alfanar or Wieland may cost more .

- Customization and modularity: Boxes with modular layouts, plug-in components, or integrated automation for energy saving and room control are priced higher .

Typical Applications

- Budget hotels: Basic models with essential protection and 4–6 circuits.
- Mid-range hotels: Units with 6–12 circuits, RCDs, and surge protection.
- Luxury hotels or suites: Advanced modular systems with energy-saving automation, smart monitoring, and aesthetic finishes .

Installation Considerations

Professional installation is recommended to ensure safety, compliance with local electrical codes, and optimal performance. Modular and plug-in systems can reduce labor costs and downtime during maintenance or upgrades . In summary, while basic guest room distribution boxes may start around \$150–\$200, fully featured, modular, and certified units for high-end hotels can reach \$500–\$600 or more per room, depending on specifications and customization .
