

Secondary Fiber Distribution Box

Overview

It is primarily used to terminate, splice, and organize optical fibers, providing a structured cabling solution for in-building and outside plant applications. The box must be designed to withstand harsh environmental conditions while maintaining optimal performance and. Fiber Distribution Hub (FDH): FDH closures are used in fiber-to-the-home (FTTH) networks to distribute fiber optic connections to multiple households. They often include a splitter for signal distribution. Our leading fiber optic hardware solutions include: The Centrix™ System is a high-density fiber management system that provides a balance of industry-leading density. The 2LINE product range is rounded off by wall distributors, fibre optic termination points and subscriber connection boxes, which can be used in all projects in both subsidised and self-supported expansion.

Article Content

Distributors: Splice Boxes & Optical Network Terminal Boxes

You can find fiber splice boxes and distribution boxes in the EFB-Elektronik online shop with a wide range of matching distributors, module racks, subracks and accessories.

Fiber Distribution Architecture

To accommodate increased bandwidth demand, integrating WDM technology into fiber optic hardware helps you get more out of your existing fiber distribution network.

2LINE Optic Fiber Management Boxes

The 2LINE COB combines the function of a network distributor with the possibility of using patch panels. These wall-mounted distributors are used in buildings or small control cabinets.
