

Time-controlled switch distribution box

Overview

With the “switchBox DIN” you can turn off, turn on or turn on devices with a power of up to 3680W for a given time! The schedule with the astronomical clock function allows you to control at a given time and at sunrise and sunset based on geographical location. AUTOMATIC ON OFF SWITCH SETTINGS: This digital timer can be automatically turned on and off according to the time set by the user. Simply set the required on off time. If a horizontal line is displayed, invalid Settings are displayed. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. From power and signal distribution to I&C applications and complete room. The Merlin Gerin Time Control Switch Box is a reliable and highly efficient solution designed for managing electrical circuits and controlling the timing of electrical operations. Create scenes and groups that will allow you to control multiple BleBox controllers at the same time.
