

Uzbekistan GGD Distribution Box

Overview

GGD AC low-voltage power distribution cabinet is suitable for power distribution systems with AC 50Hz, rated working voltage 380V and rated working current up to 3150A of power users such as power plants, substations, factories and mines, etc., as power conversion . GGD type low-voltage fixed switchgear is a new low-voltage switchgear designed according to the requirements of the Ministry of Energy, the majority of power users and the design department in accordance with the principles of safety, economy, rationality and reliability. It is divided into three types: GGD1/GGD2/GGD3, with different segment current capabilities. It is used by power plants, substations, and industrial enterprises for the conversion, distribution, and control of electric energy for power. Ggd distribution box are essential components in modern electrical infrastructure, designed to manage and distribute electricity safely and efficiently within various settings. If the user has special requirements, it can also be driven into the line knock.
